Summary of Analytical Results of ESW Carbon Samples EWS Biochar (received on 2016Oct21)

Parameter	Results	Method
Carbon Content on a dry basis	81.61% ± 0.044% at 95% confidence	ASTM E777 Standard Test Method for Carbon and Hydrogen in the Analysis Sample of Refuse-Derived Fuel
Ash Content	2.70% ± 0.756% at 95% confidence	ASTM D2866 Standard Test Method for Total Ash Content of Activated Carbon
pH	8.55 at a biochar-to-water ratio of 1 : 4.6	Saturated media extract method

Note: The EWS sample was ground and dried in air to 103°C to constant weight. A subsample was taken for the lab analyses. This sample preparation was based on In-house method modified based on ASTM E829.
