

Statement of Interest

10/31/2013

Robbert Visscher CFO, Kevin Hull VP Business Development
1000-355 Burrard St. Vancouver, BC V6C 2G8 Canada

This letter is to indicate **ABB's** interest to join in a consortium to first participate in the Request for Expression of Interest and Qualification phase and if selected, to work on the Hog Fuel Remediation Project for Watson Island, Prince Rupert BC. To this effect **ABB** is prepared to work towards a Consortium Agreement stipulating deliverables and responsibilities between the Consortium Partners in more detail, should the Consortium be selected.

ABB is Electrical Engineering Services and Automation Company. We have the means and equipment to design and support a fully Automated DCS system including all controls, drives, electrical support products for control panels on a mobile skid if required. We will do this at best discount, terms and flexibility to support this first project.

For this collaborative activity, Nicholas Masucci will be our contact person and can be reached per the contact information below.

ABB agrees to the use of our name and logo on the submission of the joint application for the RFEIQ and possible subsequent proposals.

We look forward to closely cooperate to ensure the success of the consortium and project.

Sincerely,

Nick J Masucci
